

III. RoHS Compliance: Pretec Green Products

Pretec is committed to protecting the safety and health of our customers, facilities, employees, partners, and the communities where we do business throughout the world. We seek to meet environmental standards and requirements in the production of all Pretec products. Toward that end, we do the following:

- Design our products to minimize power use and to meet all applicable standards and regulations.
- Consider environmental criteria when evaluating products and processes.
- Provide a safe and healthy workplace for our employees.
- Utilize recycled materials wherever practical.
- Review and manage environmental issues and projects regularly.
- Plan for full compliance with local laws and regulations, in addition to international standards - including the European Union Directives on Restriction of Hazardous Substances (RoHS) and Waste Electrical and Electronic Equipment (WEEE) management laws.

The following products manufactured on or after 1/1/2006 and marketed in Europe will comply with the European Union Directives on RoHS (refer to Table 1). From 7/1/2006, all Pretec products will comply with the directives on RoHS (refer to Table 2). Contact David Lin <davidlin@c1tech.com.tw>, if you have any questions regarding Pretec compliance of RoHS or Green Policy.
